

SAURABH SHIRBHATE

SOFTWARE DEVELOPER

Pune, India showoffbabyy@gmail.com github.com/saurabh linkedin.com/in/saurabh Open to work

01 SUMMARY

Software Developer who believes the best systems are the boring ones: predictable, documented and fast. At Sapiens I build the GhostDraft configuration layer that lets insurance products ship in days instead of weeks — Core Java, MySQL, and XML/XSD/JSON document pipelines for P&C products. The same engineer's patience goes into every API, microservice and AI feature I touch, from the database to the browser.

02 EXPERIENCE

Associate Technical Analyst @ Sapiens

Apr 2025 — Present

INSURANCE · P&C · GHOSTDRAFT PRODUCT CONFIGURATION

- Own XML/XSD/XSLT document-transformation pipelines that turn analyst-authored rules into running product logic.
- Develop Core Java + Spring Boot tooling that validates product definitions before they reach a build.
- Model P&C business rules as structured, versioned GhostDraft configuration persisted in MySQL.
- Run the Scrum cadence — document automation, workflow management, and troubleshooting configuration defects.
- Result: product rollouts that took weeks now take days; config defects caught at authoring time.

Core Java Spring Boot MySQL GhostDraft XML / XSD / JSON Scrum

Web Development Intern @ Mine8 Automations, Nagpur

Dec 2022 — Jun 2023

CLIENT-FACING WEB EXPERIENCES

- Built and maintained responsive client-facing web pages and interactive components.
- Converted design mockups into cross-browser layouts; introduced code reviews within the small team.

HTML CSS JavaScript jQuery Bootstrap

Full-Stack Developer — Independent Projects

2023 — 2025

END-TO-END PRODUCT ENGINEERING WITH AI

- LedgerLens — a Spring Boot microservices expense tracker (ledger, categorisation, insights) with AI integration; MySQL persistence, Dockerised deployments.
- PolicyPal AI — an LLM + RAG assistant that answers questions from policy documents with strict citations.
- Designed schemas, built REST microservices, shipped React/TypeScript frontends, containerized with Docker.

React TypeScript Spring Boot MySQL Docker LLM / AI

03 EDUCATION

Bachelor of Engineering
GH Raisonni College of Engineering, Nagpur
2019 — 2023

- Foundation in data structures, DBMS and software engineering
- Led academic projects end-to-end

PG-DAC
CDAC, Pune
2024

- Java full-stack specialization: Spring Boot, Hibernate, REST, SQL
- Frontend integration with React

04 SKILLS

BACKEND CORE
Java · Spring Boot · Hibernate · REST APIs · Microservices · System Design

DATA & STORAGE
SQL · MySQL · PostgreSQL · MongoDB

INTELLIGENCE & MODERN
AI Tools · Modern Development Tools

FRONTEND & UI
React · JavaScript · TypeScript · Tailwind CSS · Next.js

DEVOPS & TOOLS
Docker · Git · GitHub · AWS / Cloud · Maven · Postman

05 PROJECTS

FCBankers · Sapiens · 2025
GhostDraft configuration layer — Core Java, MySQL, XML/XSD/JSON — letting markets configure insurance products without a developer in the loop. Rollout time dropped from weeks to days.

StarrKInsurance · Sapiens · 2025
Policy technical analysis on the GhostDraft configurator: automated document generation, managed workflows, and scrum-driven troubleshooting of configuration defects.

PolicyPal AI · 2026
LLM + RAG assistant answering questions from policy documents with strict citations — Java + Spring Boot over embedded policy PDFs, React front-end.

LedgerLens · 2026
Microservices expense tracker with AI integration — ledger, categorisation and insights services; MySQL persistence, Dockerised, AI auto-categorises spending.
